What is Endospheres Therapy®?

Endospheres Therapy® is an innovative Italian technology based on Compressive Microvibration®, designed to improve lymphatic drainage, stimulate blood circulation, reduce fluid retention, and restore healthy tissue function.

Unlike traditional massage techniques or treatments that focus only on the skin's surface, Endospheres Therapy® works with the body's natural physiological processes. Improved body contours and healthier-looking skin are the result of restoring proper circulation, lymphatic flow, and tissue metabolism.

Today, Endospheres Therapy® is widely used in aesthetic medicine, sports rehabilitation, and wellness programs around the world.

The primary goal of the treatment is not only to improve appearance but also to support the body's natural ability to recover, regenerate, and maintain healthy tissue function.

Many clients notice visible aesthetic improvements together with lighter legs, reduced swelling, improved circulation, and an overall feeling of wellbeing after the very first session.

The History of Endospheres Therapy®

Developed in Italy by biomedical engineers and medical specialists, the patented Compressive Microvibration® technology provides a safe, non-invasive alternative to aggressive body contouring procedures. Today it is used in more than 60 countries in aesthetic medicine, physiotherapy, sports recovery and rehabilitation.

How Does It Work?

The rotating silicone spheres generate rhythmic compressive microvibrations that stimulate lymphatic drainage, venous circulation, microcirculation, tissue oxygenation, cellular metabolism, reduce fluid retention and support regeneration—without tissue trauma or downtime.

Why Does Every Treatment Begin with the Lymphatic System?

Every treatment follows the original manufacturer protocol, beginning with activation

of the major lymphatic pathways before treating target areas. This approach maximizes both therapeutic and aesthetic results.

Clinical Evidence

Clinical observations demonstrate improvements in circulation, oxygenation, skin elasticity, reduction of swelling and cellulite after a complete treatment course. The technology is non-invasive and can be combined with other treatments when recommended by a qualified specialist.

Treatment Benefits

- Reduced swelling
- Lighter legs
- Improved lymphatic drainage
- Firmer skin
- Smoother body contours
- Reduced cellulite appearance
- Healthier skin quality
- Improved tissue elasticity
- Better circulation
- Faster muscle recovery

Special Offer for New Clients

Original Endospheres Therapy®

75-minute Full Body Protocol

Complete original treatment protocol • Full-body lymphatic activation • Deep tissue stimulation • Comprehensive body treatment

€99 (regular price €125)

Individual Treatments

75 min Full Body Protocol — €125

60 min — €105

45 min — €85

30 min — €65

Treatment Packages

Manufacturer recommendation: 12-treatment course, minimum twice per week (or every other day).

30 min: €65 | 6x €350 | 12x €650

45 min: €85 | 6x €450 | 12x €850

60 min: €105 | 6x €570 | 12x €1,050

75 min: €125 | 6x €650 | 12x €1,250

Which Treatment Duration Should I Choose?

30 min — One target area (abdomen, buttocks, thighs, back).

45 min — Legs, buttocks and abdomen.

60 min — Legs, buttocks, abdomen and additional focus areas.

75 min Full Body Protocol — Complete original protocol including lymphatic activation, back, legs, buttocks and abdomen. Recommended for the best long-term clinical and aesthetic results.
